1. Introduction

This document describes all prices relating to eircom Wholesale's ADSL / ADSL 2plus Bitstream Service and Bitstream Backhaul Service and Next Generation Services.

2. ADSL Bitstream Charges

The price for eircom's ADSL / ADSL 2plus Bitstream Service is made up of a number of elements:

- Service Establishment Charge
- Port Connection
- Port Rental
- Cessation (per port)
- Transfer (per port)
- Upgrade/Downgrade (per port)
- Aggregate usage charge (Bitstream Managed Backhaul only)
- Promotional Offers (covered in section 5)

The prices set out in the eircom ADSL/ADSL 2plus Bitstream Service may vary from time to time. Any changes to these prices are exempt from the requirements of Clause 10 of the eircom Bitstream Access Reference Offer (BARO) and the eircom Bitstream Reference Offer Minimum Term (BARO MT) and do not constitute Amendments as defined in Clause 10 of the eircom BARO and the eircom BARO MT.

Prices are effective from the date indicated on this Price List. Where applicable tables indicate the time frames for which a charge is valid with "effective from" and "effective to" dates shown. This eircom Bitstream Price List will be updated and republished from time to time.

Operators will be notified when changes are made to the Bitstream Price published on eircom's website.

The charges relevant to each service are listed in EURO.

The price for eircom's ADSL / ADSL 2plus Bitstream Backhaul Service is made up of a number of elements:

- Installation (Backhaul Provision, Downgrade, Upgrade) Charges
- Backhaul Rental Charges
- Cessation
- Other Charges

The prices set out in the eircom ADSL/ADSL 2plus Bitstream Backhaul Service may vary from time to time. Any changes to these prices are exempt from the requirements of Clause 10 of the eircom Wholesale Bitstream Access Reference Offer (WBARO) and the eircom Wholesale Bitstream Reference Offer Minimum Term (WBARO MT) and do not constitute Amendments as defined in Clause 10 of the eircom WBARO and the eircom WBARO MT.

Prices are effective from the date indicated on this Price List. Where applicable tables indicate the time frames for which a charge is valid with "effective from" and "effective to" dates shown. Where no dates are indicated, the prices are effective from 15th July 2003 but many of the listed rates have been effective for some time prior to that date. This eircom Bitstream Backhaul Price List will be updated and republished from time to time. Operators will be notified when changes are made to the Bitstream Backhaul Price published on eircom Wholesale's website.

The charges relevant to each service are listed in EURO. These charges are shown in section 3.

(*****) eircom Wholesale will charge all operators' usage on a tiered basis from 1st May 2012 until the price reduction for Bitstream MB is introduced on 1st July 2012. The format of the tiered pricing will be as follows:

Tier	Usage Charge
0-100 kb/s	€50 per Mbps per month
100.01 +	€50 per Mbps per month for the initial 100kbps (i.e. €5), plus €30 per Mbps per month for the balance over 100kbps.

For the avoidance of doubt, tiered pricing would result in a charge of €6.50 per month for a usage level of 150kbps (€5 for first 100Kbps, plus €1.50 for the balance).

3.3 Cessation Charge

As per clauses 5 and 9 in Annex C of the WBARO, the minimum period of service for any Backhaul order placed and accepted shall be twelve months commencing on the Delivery Notification. The Operator shall be liable for all charges for this minimum period.

In the event that the termination of a Backhaul is required, the Operator shall give to eircom in writing at least one month's notice, expiring on the last day of the calendar month following that in which the notice is given. Where such a termination request takes effect prior to the expiry of the minimum period of service, then the Operator shall be

liable for all charges for the remaining portion of the minimum period. Where notice is given which expires after the minimum period of service, charging shall cease on the last day of the notice period.

Where the Operator requests a Migration and such request is delivered, a new minimum period will apply to the product to which the Migration is made. If the Migration request takes effect prior to the expiry of the minimum period of the Backhaul circuit, the charges shall be waived.

3.4 Other Charges

3.4.1 Fault Related Charges

If eircom carries out work to correct a reported fault in service and finds no fault in the eircom network, eircom shall be entitled to charge the Operator for abortive work done or money spent to determine such an outcome in accordance with the applicable hourly rate in force for the time being. Please see Appendix C for the latest rates for call out charges.

4. NGA Bitstream Plus and NGA VUA Charges

The price for eircom Wholesale’s NGA Bitstream Plus and NGA VUA Service is made up of a number of elements:

- Port Rental
- Port Connection
- Migration (per port)
- Aggregate usage charge (Bitstream Plus only)
- Unicast
- Multicast
- Promotional Offers (covered in section 5)

The prices set out for the eircom Wholesale NGA Bitstream Plus and NGA VUA service may vary from time to time.

Prices are effective from the date indicated on this Price List. Where applicable tables indicate the time frames for which a charge is valid with “effective from” and “effective to” dates shown. This eircom Wholesale Bitstream Service Price List will be updated and republished from time to time.

Operators will be notified when changes are made to the Bitstream Service Price List published on eircom Wholesale’s website. The charges relevant to each service are listed in EURO.

Notes:

BITSTREAM SERVICE PRICE LIST

(1) This charge applies when a POTS Based NGA service is added to an existing PSTN/SB-WLR line or when an existing ADSL Broadband or Line Share product is migrated to a POTS Based NGA service. The SB-WLR line connection charges are outlined separately in the Reference Interconnect Offer price List.

(2) This charge applies when a new Standalone NGA service is provisioned or when an existing ULMP or an existing SB-WLR only or an existing SB-WLR with ADSL Broadband/ Line Share is migrated to a Standalone NGA service. This charge is applied in addition to one of - the Standalone NGA In situ Access connection (3) or the Standalone NGA Pre-cabled Access connection (4) or the Standalone NGA Non-Insitu Access connection (5)

(3) Standalone NGA In-situ Access connection – Where all line work is completely in place and line can be electronically enabled and there has been previous service at the address.

(4) Standalone NGA Pre-cabled Access connection – where all line work is completely in place and line can be electronically enabled and there has been no previous service at the address.

(5) Standalone Non-Insitu Access connection - Where all line work is not in place and there has been no previous service at the address.

(6) This charge applies when the NTU/ONT is installed by eircom for both POTS Based NGA services and Standalone NGA services. This charge is in addition to the charges above. The NTU/ONT charge will not apply when a Non insitu SB-WLR line is installed as part of the same order. The NTU/ONT charge will also not be applied where a Standalone NGA Non-Insitu Access connection charge occurs as part of the same order.

*Note: The lower of this number or whatever promotional price applies to the equivalent SB-WLR connection at the time. See RIO Price List for SB-WLR promotional details.

(7) In the scenario where an NGA order is completed that includes a request for the installation of an NTU and eircom's records show that an NTU had previously been installed and charged by eircom as part of an NGA provisioning or migration order, the NTU connection charge will be rebated. This regime will apply until such a time that Operators can order an insitu NGA service at a premises that has an NTU already installed through previous NGA installations. An order for an insitu service in this case means that an Operator can place an NGA order without the need to create an appointment for an end-user visit to install the NTU.

(8) In the scenario where an NGA order is completed that includes a request for the installation of an NTU and eircom's records show that an NTU had previously been installed by eircom as part of a non-insitu SB-WLR order (LNN Order) completed within the previous 30 days, the NTU connection charge will be rebated. This regime will apply until such a time that Operators can submit a combined order for non-insitu SB-WLR and NGA Bitstream/VUA.

Note: A charge of €30 will be applied for a missed appointment that is the result of a customer generated issue as defined in the NGA IPM. This charge will apply for an initial period of 90 days post launch and will be reviewed thereafter.

BITSTREAM SERVICE PRICE LIST

4.1.2 NGA Bitstream Plus Access – Monthly Rental Charges

Service	Effective From	Effective to	Price €
NGA Bitstream Plus Standalone	20/05/2013		17.50
NGA Bitstream Plus POTS Based	20/05/2013		5.98

Rental is subject Minimum Term as per the WBARO.

4.1.3 NGA Bitstream Plus Access – Data Port Extension Connection Charges

Service	Effective From	Effective to	Price €
Data Port Extension Connection Charge (up to 30m), if ordered on UG	20/05/2013		55.00
Data Port Extension Connection Charge, if order onsite by the end-user*	20/05/2013		85.00

* This option is available for 90 days after launch after which it will be reviewed for continued availability

4.1.4 NGA Bitstream Plus Unicast – Connection Charge

Service	Effective From	Effective to	Price €
Bitstream Plus Unicast (BPU) - Connection per site	20/05/2013		50.00

4.1.5 NGA Bitstream Plus Usage - Monthly Charge

Service	Effective From	Effective to	Price €
Usage per Mbps - Best Effort (BE) (95th Percentile)	20/05/2013		20.00
Usage per Mbps - Assured Forwarding (AF) (95th percentile) ⁽¹⁾	20/05/2013		25.00
Usage per Mbps - Expedited Forwarding (EF) (95th Percentile) ⁽¹⁾	20/05/2013		30.00

Note: (1) The calculation of the 95th percentile is based on taking aggregate usage measurements of an Operators' BPU circuits at 15 minute intervals. The usage measurement at each 15 minute interval determines the BE, AF and EF traffic of the Operator. The charge for usage is then calculated

BITSTREAM SERVICE PRICE LIST

at each 15 minute interval by multiplying the Mbps of usage of the three traffic types by the associated BE, AF and EF price*. The three charges are then added together to form the combined usage charge for that individual 15 minute interval. This stage is repeated at each 15 minute interval throughout the month. The usage charges calculated at each 15 minute interval for the entire month are then ranked from highest to lowest with the top 5% being removed. The highest remaining charge is the actual Usage charge for the individual Operator for that month.

* **Note:** The price for AF will always be 1.25 times the BE rate and the price for EF will always be 1.5 times the BE rate.

Example: An Operators' traffic for all their BPU circuits is measured at a particular 15 minute interval in a month. The traffic measured is found to be 120Mbps made up of 100Mbps of BE traffic, 15 Mbps of AF traffic and 5 Mbps of EF traffic. The combined usage charge at this interval is calculated as: $\{(100\text{Mbps} * €20) + (15\text{Mbps} * €25) + (5\text{Mbps} * €30)\} = \{€2,000 + €375 + €150\} = €2,525$. Therefore, the combined usage charge calculated for the Operator at this 15 minute interval is €2,525. As described above - this step is repeated at each 15 minute interval throughout the month. These charges are then ranked from highest to lowest with the top 5% removed. The highest remaining figure is the actual Usage charge for the Operator in that month.

4.1.6 NGA Bitstream Plus Multicast – Connection Charges

Conditions Applicable to Promotional Offer (section 4.22.1)

This promotion is aimed at encouraging current customers to upgrade to higher speed products.

5.22.1 Conditions Applicable to the Bitstream Upgrade promotion 8th January until 1st April 2012.

1. To be eligible for the Bitstream "Upgrade" order price promotion each telephone number/CLI must meet each of the following criteria:
 - a) The Promotion shall apply only to new Bitstream Subscriber "Upgrade (UB)" orders only to the:
 - a. "up to" 12M/1.1M Swift IP product from any IP product lower than the "up to" 12M/1.1M product
 - b. "up to" 18M/2M Turbo IP Plus product from any IP product lower than the "up to" 18M/2M product
 - b) An Operator will be eligible to receive a rebate under this Bitstream Promotion for any Subscriber's telephone number/CLI irrespective of whether a promotion rebate has previously been applied to that telephone number/CLI for any of the Bitstream promotions since 1st of June 2004; subject to all other terms and conditions of this promotion being met.
 - c) To be eligible for the Bitstream Upgrade Promotion each telephone number/CLI must be active on the upgraded Bitstream product for a minimum of **six (6)** consecutive, full months (**minimum 182 days**) to become eligible for the Bitstream Promotion rebate. This six (6)-month (minimum 182 days) period will be calculated from the "Billing Effect Date", which for purposes of the promotion is the later of the order completion date or the appointment date, for that telephone number/CLI on the Operator's Bitstream invoice.
2. eircom will provide the Operator with a list of the telephone numbers/CLIs for that Operator's Subscribers who have met the eligibility criteria defined here. This will be provided to the Operator to verify those Bitstream Subscriber upgrade orders for which eircom intends to provide a rebate to the Operator. It is the responsibility of the Operator to determine whether a potential Subscriber has not met any of the eligibility criteria set out here, as these Subscribers will not be eligible for a rebate.
3. The Operator will be charged connection, rental and other applicable charges for each Subscriber as published in the then current Bitstream Service Price List. All charges must be paid in full according to standard Billing terms defined in the Standard Agreement for the Provision of the ADSL Bitstream Service.
4. The promotion rebate will be provided as a credit on the Operator's invoice after the subscriber upgrade order becomes eligible to have the respective promotion rebate applied.
5. Offer not applicable to Downgrades (DB) or Transfer (XB) order types.
6. The Promotion Period for the Bitstream Promotion shall run from **8th January until 1st April 2012 inclusive for applicable Upgrade (UB) orders only**, however eircom reserves the right to withdraw this promotion at any time prior to that date.

5. The Promotion Period for the Bitstream Promotion shall run from **1st January until 30th June 2013 inclusive for applicable Upgrade (UB) orders only**, however eircom reserves the right to withdraw this promotion at any time prior to that date.

5.29 Bitstream Retention Promotion

The intention of this offer is to reward Operators for retaining end users on the Bitstream Service for the year of 2013.

The Operator will receive a rebate of €2 for each end user still on the Bitstream Service with the operator from 1st January to the 31st December 2013.

The terms and conditions of the promotion are as follows:

- This promotion is applicable to all Bitstream MB and Bitstream IP products.
- A list of the relevant end users on Bitstream with an Operator as of 1st January 2013 will be supplied to the Operator in January 2013. If this end user is still on Bitstream with the same Operator at the end of the 12 months without ceasing or transferring the Operator will receive a €2 rebate per customer.
- The end user can upgrade or downgrade within the Bitstream Service product sets within the year.
- The rebate will be calculated in January 2014 and will be credited against the next available Bitstream bill.
- The calculation of the rebate will be provided to each Operator.
- The list of CLIs relevant to the rebate will be provided to each Operator.
- The promotion will include migrations to NGA Bitstream Plus and NGA VUA

5.30 Bitstream Usage Promotion

eircom are creating four tiers of usage for the Wholesale Customer per end user on the Bitstream MB products.

Average Usage	Per Mb/s Charge
0 -> 100 kb/s	€30
101 -> 150 kb/s	€30 per Mbps per month for the initial 100kb/s plus €20 per Mbps per month for the balance over 100kb/s less than 150kb/s.
151 -> 200 kb/s	€30 per Mbps per month for the initial 100kb/s plus €20 per Mbps per month for the balance over 100kb/s less than 150kb/s. plus €15 per Mbps per month for the balance over 150kb/s less than 200kb/s.
200 kb/s +	€30 per Mbps per month for the initial 100kb/s plus €20 per Mbps per month for the balance over 100kb/s less than 150kb/s. plus €15 per Mbps per month for the balance over 150kb/s less than 200kb/s plus €10 per Mbps per month for the balance over 200kb/s

For the avoidance of doubt, tiered pricing would result in a charge of €5.25 per end user per month for a usage level of 250kb/s (€3 for first 100kb/s plus €1 for the 100 to 150kb/s plus €0.75 for the 150 to 200kb/s plus €0.5 for the balance).

The Promotional Period for the Bitstream Price Promotion 1st January until 30th June 2013.

The rebate will be calculated and applied to the Bitstream Backhaul Bill at time of Billing of the Bitstream MB Usage.

The details of the calculation will be supplied to the Operators in the week following the Billing of the Bitstream MB Usage.

Appendix A – Bitstream MB Additional Details

For the Bitstream Managed Backhaul (Bitstream MB) product a new VLAN is required on the Bitstream (Ethernet) Connection Service to carry the Bitstream MB traffic separately to the existing Bitstream IP traffic.

The Operator will be billed for the amount of capacity that they use on this dedicated VLAN over their BECS connection using the 95th percentile usage based model. This is in addition to the fixed charge per DSL port.

95th Percentile Billing is a standard way in which bandwidth is billed by ISP's. Typically it means that samples are taken every 5 minutes for a month and the top 5% are discarded. This allows the Operator to have short periods (less than 36 hours total for the month) where higher than normal bursts in traffic do not count against the amount being charged. The 8Mb and 24Mb Bitstream MB traffic will use the same VLAN and the usage will be based on an aggregate figure using the existing calculation.

The Usage will be included on the Backhaul Bill which will be changed from quarterly to monthly billings. The existing Backhaul charges will still only be applied on a quarterly basis.
